***Election/Restrictions***

Applicant's election with traverse of Group II in Paper No. 7 is acknowledged. Claims 1-9 are currently withdrawn from consideration because these claims read on the nonelected invention. After consultation with Examiner's working in class 482 the restriction is being redrawn as follows:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to furniture, classified in class 312, subclass 198.
- II. Claims 10-18, drawn to computer assisted exercise equipment, classified in class 482, subclass 4.
- III. Claims 19 and 20, drawn to a method of monitoring an exercise regimen, classified in class 482, subclass 9

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as furniture for an office. See MPEP § 806.05(d).

Inventions I and II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 3637

process of using that product (MPEP § 806.05(h)). In the instant case the product can be used without the process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Claim 1 is generic to a plurality of disclosed patentably distinct species comprising the species of Figures 1, 2, 9-12, the species of Figure 3, the species of Figure 4 and 5, the species of Figures 6 and 7, the species of Figure 8, the species of Figure 9, the species of Figure 10, and the species of Figures 13 and 14. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. W. Bachand on 26 June 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3637

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
